

AmSafe Inflatable Seatbelts

✈️ *The Ultimate Upgrade That Could Save A Life*

AmSafe's Seatbelt Airbag isn't just a seatbelt – it's a complete system of safety. Within milliseconds of sensing a crash, a large airbag stored in the lap belt is inflated with gas and deploys up and away from its user to prevent head injuries.

- ✈️ *Seatbelt Airbags can be used on Cessna models 172, 177, 182, 206, 210 and many other legacy aircraft.*
- ✈️ *Seatbelt Airbags meets g-force requirements of 26g for pilot/co-pilot and 21g for passenger seats.*
- ✈️ *The system is easily installed, self-contained, self-powered, and weighs only about 2 lbs.*
- ✈️ *Activates as soon as you buckle the seat belt.*
- ✈️ *Keep safe with the technology of AmSafe Seatbelt Airbags.*
